Keep Your Car Parked

High pollution levels are no longer just a big city problem, they are affecting communities like the Greater Lansing area. Our community failed the EPA air quality standards, and high ozone levels could lead to an increase in health issues. But you can help prevent further health issues by choosing Clean Commute Options.

Just once or twice a week try getting around another way. Take the bus, carpool or vanpool, bike, or walk. You could save some money and help to reduce traffic congestion and pollution.

It all adds up to cleaner air

To help contribute to a cleaner community, please fill out this application and fax or mail it to CATA Clean Commute Options. CATA staff will enter your information into a confidential database and provide you with any information that you request.
